Adhering buttons and heavy fabric to glass is easy with GlueFilm™!

Supplies:

- (1) 12" x 12" piece of Streuter GlueFilm™
- Diamond-shaped glass ornament blank
- Vintage Santa from Christmas Cotton Scraps-*Crafty Secrets*
- Ultra-Shape Xpress, Oval Template, Luggage Template, and cutting mat-*Fiskars*
- 20 Vintage buttons
- Ribbon
- Craft iron or heat gun
- Glitter glue

Instructions:

1. Working on the cutting mat, use the Ultra Shape Express and the oval template to cut out the vintage Santa. Cut a piece of GlueFilm™ the same size. Place the GlueFilm™ and the Santa on top of the ornament blank, and adhere using the heat gun or iron.
2. Cut out 20 circles of GlueFilm™ using the Ultra Shape Xpress and the smallest circle on the Luggage template. Lay them in position on the glass, then place the buttons on top. Use the heat gun or craft iron to warm the buttons, causing the GlueFilm™ to activate! (make sure the buttons are somewhat heat resistant)
3. Highlight the ornament with glitter glue, then thread ribbon through the hole and hang!
